

Production Access Questionnaire

Testers Community

The objective of this report is to provide comprehensive answers that our clients can use to fill the production access form. You can use the answers directly or can make changes based on how you improved the app. After 14 days of testing, users will be prompted to fill a form on closed testing to get access to production. This document can be helpful in answering those questions.

App Name: Wound7 Wound Tracker

App URL:
https://play.google.com/store/apps/details?id=com.wound7.wound_tracker

Production Access Questionnaire

1) How did you recruit users for your closed test? For example, did you ask friends and family, or use a paid testing provider?

We used a paid testing provider to gather comprehensive, professional feedback on the app. Additionally, we reached out to some of our target users, including healthcare professionals and patients, to collect insightful real-world feedback from the intended audience.

---

2) How easy was it to recruit testers for your app?

Answer: Easy
(You can select your own answer).

---

3) Describe the engagement you received from testers during your closed test

Testers actively engaged with the app, providing valuable insights on UI improvements, login processes, and feature enhancements. Their feedback

led to significant refinements, particularly in user experience and accessibility, ensuring a more intuitive app for all users.

---

4) Provide a summary of the feedback that you received from testers. Include how you collected the feedback.

Testers highlighted the need for improved ASO, enhanced UI/UX, dark mode support, automatic login, and a "Share App" feature. Feedback was collected through surveys, direct communication, and usability testing sessions, allowing us to address critical areas for improvement.

---

5) Who is the intended audience for your app?

Wound7 Wound Tracker is designed for patients and healthcare professionals seeking an efficient way to document and communicate wound care. It caters to individuals who require a reliable tool for tracking wound changes and enhancing doctor-patient communication.

---

6) Describe how your app provides value to the users.

Wound7 Wound Tracker empowers users to document wound changes conveniently, providing offline multilingual guidelines, encrypted storage, and easy sharing options. This enhances communication with healthcare

providers, ensuring effective wound management and informed follow-up care.

---

7) How many installs do you expect your app to have in your first year?

Answer: 10k - 100k
(You can select your own answer).

---

8) What changes did you make to your app based on what you learned during your closed test?

In response to user feedback, we optimized the UI/UX for better layouts and color contrast, added a "Share App" feature, and improved login processes. We also implemented dark mode support and are working on a System Theme option for enhanced user comfort.

---

9) How did you decide that your app is ready for production?

After thorough testing phases, we incorporated vital feedback from diverse testers, resolved key UI issues, and ensured the app is stable, user-friendly, and fully optimized, confirming its readiness for a successful launch on Google Play.

10) What did you do differently this time?

This time, we focused on engaging a diverse group of testers to gain varied insights, prioritized user experience enhancements based on structured feedback, and implemented features that directly address user needs, resulting in a more polished and ready-for-production app.

You can use the above answers or add your personal touch to those answers to make them more natural and meaningful. Don't forget that this form plays the most important role in the entire process of getting production access. If you have any more questions, please feel free to contact us.

Best regards,
Testers Community Team
